Technical Skills & Tools:

HTML Email Marketing Templates, HTML5, CSS3, Bootstrap, SASS, Javascript, Git, Axe, & Andi

Profile

I am a creative problem solver and mover of mountains. I am a mostly self taught motivated software developer and advocate for equal accessibility. I'm knowledgeable in section 508 standards, testing process, tools, results & remediation reporting of nonconformance and best practices. I create beautiful and accessibile UIs that cultivate an easy, pleasant, stress free experiences for users of my products. I am actively working towards achieving equity in web accessibility one page at a time.

Experience

Customer Service

- Lead monthly meetings with families, listened to input on programs, and acted as a liaison between stakeholders and Board of Directors.

- Answered calls, email correspondence, and resolved customer or product issues.

Office Administration

- Scheduled calendar appointments, meetings, conference calls, travel coordination, and translation.

- Completed program enrollments, organized and maintained health files and all agency documents.

Human Services

- Provided direct services to a caseload of 60 families and coordinated referrals to community programs.

- Mentored and managed an intern to identify areas of need with families and collaborate with them to create a plan of action and motivate them to achieve measurable goals during the program.

Technical

- Built static websites with HTML & CSS using version control with Git and GitHub while problem-solving issues and building full-stack software development skills.

- UI/UX Design, created wireframes with AdobeXD, and edited photos using Gimp photo editing software for the creation of static websites.

- Built table-based email marketing templates for campaigns on Mailchimp and other ESPs during self-guided learning.

- Knowledge of Web Accessibility Tools and Section 508 & WCAG Testing Methods, Compliance, and Standards.
